Full-stack software engineer with two years of experience building and maintaining REST APIs, data pipelines, and web features across Python, JavaScript, SQL, and AWS. Shipped containerized services with Docker and GitHub Actions CI/CD, and built ETL pipelines processing 2M+ records.

EDUCATION

Northeastern University - Boston, MA | *Master of Science, Computer Science* | GPA: **4.0** *Expected Dec 2027*
Coursework: Database Management Systems, Algorithms, Building Scalable Distributed Systems, Machine Learning

R V College of Engineering - Bangalore, India | *Bachelor of Engineering, Computer Science and Engineering* 2023

PROFESSIONAL EXPERIENCE

Associate Software Engineer | *Digitide Solutions Ltd* - Bangalore, India *September 2024 - June 2025*

- Automated data collection and reporting pipelines using Python scripts against PostgreSQL, delivering reliable data feeds for cross-functional stakeholders.
- Built a modular SaaS platform using Angular, FastAPI, and PostgreSQL, serving 1,000+ daily users across 4+ microservices and 20+ REST endpoints.
- Built an AI chatbot in FastAPI using the OpenAI API, grounded in PostgreSQL lookups and document retrieval, cutting manual lookup time by 60%.
- Streamed real-time sensor telemetry over WebSockets into live dashboards for proactive environmental alerting.

Software Engineer, Full Stack | *Zevvo* - Bangalore, India *January 2024 - July 2024*

- Automated GitHub Actions pipelines deploying Dockerized containers to AWS ECS, using AWS Lambda and S3 for background jobs and static assets.
- Built the admin portal and customer-facing site using React, Node.js, and Express, taking the product from zero to production in 4 months.
- Designed 15 MongoDB collections backing 35+ REST endpoints across bookings, billing, subscriptions, and catalog.
- Implemented JWT authentication with httpOnly cookies, participating in code reviews that reduced auth-related bugs by 40%.

Software Development Intern | *Crestron Electronics* - Bangalore, India *March 2023 - July 2023*

- Added pagination, fuzzy search, and composite indexes to REST APIs backed by MSSQL, cutting average response time from 500ms to 250ms.
- Built mobile-responsive JavaScript and React components, including admin panels and connected-device dashboards.
- Wrote Jest component-rendering tests, increasing coverage from 62% to 79% and reducing post-deployment bugs by 20%.

ACADEMIC PROJECTS

SportsTV Streaming Data Warehouse - *Python, SQL* *Fall 2025*

- Engineered a bulk-batched, idempotent ETL pipeline with surrogate-key resolution, achieving a 99%+ match rate across 2M+ streaming transactions from heterogeneous sources.
- Applied partition pruning across the pipeline to keep transformation jobs efficient at scale.
- Modeled a Kimball-style star schema with five conformed dimensions and a RANGE-partitioned fact table, and generated a fully automated BI report driven entirely by live SQL queries.

TECHNICAL SKILLS

- Languages:** Python, JavaScript, TypeScript, Java, C#, SQL, HTML, CSS
- Cloud and DevOps:** AWS (EC2, S3, RDS, Lambda, ECS), Docker, GitHub Actions, CI/CD, Git
- Backend and APIs:** FastAPI, Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, MySQL, MSSQL
- Data:** ETL Pipelines, Data Modeling, Star Schema, Data Warehousing
- Frontend:** React, Angular, Responsive Web Design
- Soft Skills:** Cross-Functional Collaboration, Problem-Solving, Ownership, Effective Communication
